Imagery Style

The background of the entire page is a grayscale photograph of several hands of different skin tones reaching up and holding a vertical dotted line. The hands are positioned at various heights, creating a sense of collective effort and support. The dotted line is composed of small, evenly spaced dots.

Rationale

Preface's identity reflects how we help start-ups grow from a single idea into a strong and lasting brand.

Our graphic elements centre around interconnected lines, where thick single lines represent the **strong foundations we build**, while a growing network of fine lines symbolises how brands we work with continue to **strengthen over time**.

This carries into our imagery system where mixed media graphics reflect our **lively personality and fresh creative thinking**, while grainy textures and rough linen elements add depth to represent our **thoughtful approach and attention to detail**.

Human figures, especially hands and faces, reinforce our **down-to-earth personality** through warmth and connection, while paper scraps and letter elements are reminiscent of books, referencing the name Preface and the role we play in **shaping the first chapter of a brand's journey**.

This same balance between creativity and reliability is reflected in our typography and colour system.

The handwritten strokes of the Madelyn typeface shows warmth and personality while resembling flowing lines, reinforcing themes of connection and growth throughout Preface's identity. The bold, sharp structure of Etna Sans Serif brings confidence and clarity, supported by the clean readability of Poppins.

The combination of handwritten and geometric typography we use shows how **Preface balances creativity and strategy in our work**.

Royal Blue conveys trust and creative energy while Muted Light Blue softens the energetic tone, making the duo approachable. They are paired with Muted Pink and Cream Beige to ensure Preface's colours **feel warm, lively yet reliable**.

Together, every element works as one connected system - helping Preface create brands that feel human, creative, and built to grow stronger with time.
